Professional Summary

Software Engineer with 2+ years of experience in Backend Development, Full Stack Development, REST API Design, Database Management, AI-Powered Applications, and Cloud Deployment. Experienced in building scalable web applications using Python, JavaScript, Node.js, React.js, MongoDB, MySQL, and AWS. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, System Design, DBMS, Operating Systems, and Software Engineering principles. Proven track record of delivering production-grade software solutions, optimizing application performance, and developing client-facing platforms.

Skills

Programming Languages: Python, Java, JavaScript, SQL, C
AI & Machine Learning: Natural Language Processing (NLP), Machine Learning, LSTM, KNN, SVM, Deep Learning
Backend Development: Node.js, Express.js, NestJS, REST APIs, API Development, Authentication, JWT
Frontend Development: React.js, Next.js, HTML5, CSS3, Bootstrap, Responsive Web Design
Databases: MongoDB, MySQL, Database Design, Query Optimization, Data Modeling
Cloud & DevOps: AWS, Git, GitHub, CI/CD, Deployment, Version Control
Software Engineering: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering, SDLC, System Design, Agile Methodologies

Professional Experience

Dignight Infotech(Dignight Group Of Companies)

Delhi

Software Engineer

Feb 2025 - Present

- Developed and maintained scalable backend applications using Python, JavaScript, SQL, MongoDB, and MySQL, ensuring high performance and reliability.
- Designed and implemented 15+ RESTful APIs for enterprise applications, improving system scalability, maintainability, and integration efficiency.
- Built AI-powered chatbot solutions using Natural Language Processing (NLP), automating customer interactions and streamlining business workflows.
- Optimized backend services and database queries, resulting in faster API response times and improved application performance.
- Collaborated with cross-functional teams to design, develop, deploy, and maintain production-ready software solutions on AWS cloud infrastructure.

Grihp Biotech Private Limited

Gurugram

Business Strategist

July 2024 - Jan 2025

- Utilized data analytics tools and advanced Excel/SQL scripts to aggregate market datasets, reducing competitive analysis processing time by 30%.
- Translated quantitative market research data into structured business intelligence, building data models to support strategic planning and revenue growth.

Internship

Daffodil Software Private Limited

Gurugram

Business Application Developer

Jan 2024 - July 2024

- Developed and maintained business applications following best software engineering practices.
- Improved application response time by 30% through performance optimization and efficient coding practices.
- Resolved critical production issues, reducing system downtime by 25%.
- Collaborated with developers, product teams, and QA engineers throughout the Software Development Life

Cycle (SDLC).

- Implemented scalable software solutions that reduced customer support requests by 25% and increased customer satisfaction by 15%.

Wisflux Private Limited

MERN Stack Developer

Jaipur

May 2023 - July 2023

- Developed 5+ full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Built responsive user interfaces using React.js, HTML, CSS, JavaScript, and Bootstrap.
- Developed backend APIs and integrated MongoDB database functionality.
- Participated in Agile development processes and collaborated with cross-functional teams.
- Contributed to scalable and maintainable application architecture.

Education

Indian Institute of Information Technology Vadodara

B.Tech in Computer Science Engineering.

Dec 2020 - May 2024

CPI: 7.0/10.0

Projects

Vande Bharat Kabaddi League Platform (Client Project) – [Live Link](#)

- Developed and deployed a full-stack sports league platform.
- Built frontend using React.js and Next.js.
- Developed backend APIs using Node.js and Express.js.
- Integrated MongoDB and delivered the project directly to the client.
- Tools & technologies used: React.js, Next.js, Node.js, Express.js, MongoDB, REST APIs, JavaScript

AI Resume Analyzer

- Built AI-powered Resume Analyzer using Python, NLP, and Machine Learning.
- Implemented ATS score evaluation, keyword extraction, and job-role matching.
- Developed REST APIs for resume parsing and recommendation generation.
- Integrated ML models for candidate classification and skill-based job recommendations.
- Tools & technologies used: Python, Flask, NLP, Machine Learning, REST APIs, Scikit-Learn

Achievements

- Solved 500+ Data Structures and Algorithms (DSA) problems across [LeetCode](#)  and HackerRank.
- Achieved a 5-Star Rating in problem-solving on HackerRank.
- Built and delivered production-grade software applications for real-world clients.

Positions of Responsibility

President - Mess Committee

Feb 2022 - Oct 2023

- Established and led the Mess Committee, recruiting and managing a dedicated team.
- Coordinated operations, vendor communication, and conflict resolution.
- Demonstrated leadership, decision-making, stakeholder management, and organizational skills.
